Don't forget Saturday night dances in the Legion Hall.

Eucharistic Day at Rockyford July 6

It is expected that there will

be a large gathering of the members of the various Catholic Parishes of the Drumheller Deanery on Sunday, July 6 at Rockyford when the Eucharistic Day sponsored by the Catholic Youth Federation will be held. This religious event for the Catholics of the district is under the patronage of His Excellency the Most Reverend Francis P. Carroll, D.D., the Bishop of Calgary, who will be present. The ceremonies which

will be held outdoors on the spacious grounds of St. Rita's Church will commence at 3:00 p.m. M.S.T., and will consist of a procession, the recitation of the rosary with members of the C.Y.O. participating in symbolizing this prayer, a sermon on the

Sacrament of the Eucharist and closing with Benediction at

which His Excellency the Bishop will preside.

The day will be brought to a close with baseball, the Drumheller-Rockyford combines vs. the Beiseker-Strathmore combines and fastball by girls teams from the different parishes. Those attending are advised to bring lunch and refreshments will be provided by the Rockyford Council of the Knights of Columbus.

Rev. R. R. Hinchev To Hold Farewell Service June 29

Rev. R. R. Hinchev will take as his farewell message to his Carbon congregation "Sowing and Reaping." The choir will sing the anthem "My Faith Looks up to Thee" and Mrs. Bob Shaw and Donald Gordon will render vocal solos.

A friendly welcome to all.

There will be a social hour in the Irricana church following the evening service.

Juniors Defeat Beiseker

The Carbon junior baseball team journeyed to Beiseker on Tuesday evening to play a return game and came out on the long end of a 6-0 score. Despite the rain which fell during most of the game Don McLeod had 18 strikeouts to his credit.

Swalwell Girls Win

Swalwell girls fastball team trounced the Carbon girls team in an exhibition game played in Carbon Sunday evening.

OUR HALF ACRE

By J. G. Umbricht

Weed Control

Many of our most pernicious and troublesome weeds become well established before we realize the seriousness of them. New weed varieties are brought into the district in a number of ways. The two most common ways of infesting land with new weeds is by bringing in seed or feed from another district. A keen lookout should be maintained at all times to spot any unwelcome intruders and if any are found they should be destroyed immediately.

Most weeds if discovered and properly dealt with before they have become established are quite easily eradicated, but if they are allowed to get established they are a source of trouble and expense.

It is a good idea to teach the boys and girls to know the weeds. Their powers of observation are notably more acute than those of many adults.

If you find some weeds you are unable to identify get in touch with the field supervisor, Municipal Office, Three Hills or N. F. Bell, district agriculturist, Drumheller.

Summerfallow

The most important operation in summerfallowing, from the standpoint of soil drifting control, is the first operation in the spring. Leave a good trash cover as it affords the best and most practical way of preventing soil drifting under a variety of soil and climatical conditions.

Irricana Trounces Carbon Seniors

Carbon suffered defeat to the tune of 18-3 in a Kneehill Baseball League game at Irricana on Sunday last.

Christ Church Service

A service will be held in Christ Church, Carbon, Sunday, July 6th at 7:30 p.m., Ven Archdeacon Axon in charge.

Memorial Service

Carbon Branch of the Canadian Legion are holding a Memorial Service in the park on Sunday, June 29 at 3:30 p.m.

Veterans will meet at the Legion Hall at 2 p.m., and all veterans are invited. The service is open to the public and all are invited to attend.

WORLD OF WHEAT

Crops are Being Improved

The Crop Testing Plan which operates on a non-profit basis, has distributed during this past year between professional seed growers and farmers 44 percent more registered and certified seed than it did last year, and last year itself showed the highest sales in 17 years. This means that the quality of prairie crops, particularly of wheat, is certainly being improved year by year. The ever growing publicity to farmers by Crop Improvement Associations, including the Crop Testing Plan has undoubtedly had much to do with these increased sales.

Of the wheats Thatcher was in the greatest demand. Next to Thatcher came Red Bobs, with Regent in third place. With the oats, as usual Victory was far and away in advance of all other varieties; next to Vic-

tory coming Eagle with Larain third. With the barleys, OAC21 again was the most popular variety sought by farmers, with Olli next and Warrior in third place.

It will be observed by this that farmers tend to follow the advice of St. Paul to hold fast to that which is good. New varieties, therefore, now becoming available will have to prove themselves to be better in the field than existing sorts before they will displace the present varieties.

FARMER'S COLUMN

By R.J.M.

I once heard a man say, "Oh! I'm only a farmer." Have you ever heard that remark, I'm sure you have. I hope that that phrase will never be used again. Farming has always been an honorable profession. Listen to what "Ovid" has to say about farming. "Today, the profession of farming is more important

than ever. To illustrate, have you any idea of how much food it takes for one day in a city like Montreal or New York? You, as a farmer help feed the population of the world."

Probably it could be argued that towns in farming areas are there for the benefit and convenience of the farmers or that the farming population are the source of income for the towns, but let us remember that both are dependent on the other.

Many years ago farming was adorous and primitive; plows were made of wood. Today, these plows have undergone many changes as have all other farm machinery. Our farmers today are intelligent and ingenious. They have to be in order to manage the large farm units with the multitudinous problems. The problems of farming are not just local but are national and world wide. Hog production for Britain is a good example of the world importance of farming today.

The story of steel bears a close relationship to the advancement of agriculture. After new methods of rolling steel we find many changes in farm machinery as we also find advancements in transportation. Transportation plays a very large part in feeding the world after the farmers have produced the food. Transportation, steel or farming are large subjects that would make stories in themselves.

A farmer is an individual yet to be completely successful, he has to be community and nationally minded. Your individual problem could well be important enough to affect the entire community. Therefore, in

addition to being an individualist you must be a co-operator with others. As I write on I can imagine many ways of eulogizing our farmers and stating how important they are. You should be proud to be a farmer and refrain from using the phrase, "I am just a farmer."

Do People Prefer Gold

A dollar bill is a promissory note in which the Bank of Canada promises to pay one dollar to the bearer on demand. When our money was backed by gold that meant that the bearer could go to the bank and exchange his dollar bill for a certain quantity of gold.

Since we abandoned the gold standard the Bank is no longer obliged to pay in gold and all it will give us for our dollar bill is another one like it. Because the Canadian people are accepting this money without question the soft money advocates are telling us that the people prefer it to the old gold-backed currency.

There is a very simple way of finding out what the public think on this matter. Let the Bank of Canada announce it will redeem its notes in gold. If the people prefer the unbacked paper currency they will keep it and not bother with the gold. But if they rush to exchange their convenient paper currency for the less convenient gold, it will show that gold is more highly esteemed than any paper the government can issue.

A landlord is a displaced owner.

The Tourist Business is PLUS BUSINESS ... it's your business

Sure, his auto license plates are strange, but the money in his pocket is "Plus" business! He's a cash customer -- and you and your neighbors all benefit from the money he spends. The dollars he spends on gasoline, accommodation, amusement, entertainment, meals and food and farm products, all go back into your pockets. This year make The Tourist your BEST customer -- and your FAVORITE Customer -- Treat him with friendliness and courtesy.

Show tourists you appreciate business
PRACTICE COURTESY
it's the secret of satisfied customers.

INSERTED BY
BREWING INDUSTRY OF ALBERTA

Somewhere, on a hospital cot, someone's life is slowly slipping away.

That life can be saved. That man, or woman, or little child can be welcomed back with tears of joy by friends and loved ones.

You can be the means of keeping this thread of life from breaking. Your blood can help someone to live who otherwise would die. For blood is life itself. Will you donate your blood to the Canadian Red

Cross Blood Transfusion Service?

This great new civilian Blood Transfusion Service has been opened by the Red Cross to provide whole blood and plasma, FREE... not even a Hospital Service charge, to all hospital patients in Canada who need it.

No greater gift can you ever give -- for blood is life itself.

Contact your local Red Cross Branch or clinic, and say -- "Yes, I will be a donor."

Give blood that others may live
CANADIAN RED CROSS

Dr. Greenhill Heads Blood Transfusion Service

The appointment of Dr. Stanley Greenhill, Toronto, Ontario as Medical Director for the Canadian Red Cross Blood Transfusion Service of Alberta was announced today by the Red Cross headquarters in Calgary.

Born in Glasgow, Scotland, Dr. Stanley Greenhill is the son of Baillie Ernest Greenhill, OBE, JP, and Mrs. Greenhill of that city. He reached his early education at Kelvinside Academy and began his studies in medicine and zoology at the University of Glasgow, taking part in several Carnegie ecological expeditions to the islands off the north of Scotland.

In 1938, Dr. Greenhill came to the United States where he continued biological studies at the University of California. At the outbreak of war employed in the British information Service in the United States and when this service was reorganized was given leave to complete his degree at the University of Toronto. He graduated in 1944 and enlisted in the Royal Air Force in the same year.

For two years he served as clinical pathologist in the RAF and carried on work in tropical medicine. He returned to Canada last and enrolled in the course for the Diploma of Public Health at the Hygiene, University of Toronto. He completed this course in May.

Dr. Greenhill's interests include photography and mountain climbing which he did during his vacations in Scotland and California.

Every contact that you make with others is either a bridge built or a gulf dug.

Higher Prices at Tobacco Auctions

Prices for flue-cured tobacco averaged 25 percent above last year's figures at the recent opening of the tobacco auction sales in Southern Rhodesia. Peak was reached during the first three days at 57 pence (approx. 95c) per pound, later settling to an average of 48.48 pence (approx. 81c), although with a strong market there was an indication that prices would remain high. While it is expected that the new United Kingdom taxes on tobacco will reduce tobacco consumption and ultimately reduce imports, it was not considered that southern Rhodesia producers would feel the effects of this for some time.

It Pays to Play

Canadians are going in for fun and physical fitness in a big way, according to a review of the production of toys and sports equipment published by the Department of Trade and Commerce this week.

Pent-up public demand, occasioned by war-time restrictions, has sent Consumer demand sky-rocketing, and production has more than kept pace. Fishing tackle, for example, is now produced by some sixty Canadian manufacturers, compared to approximately twenty before the war. In the output of hockey sticks, baseball bats, archery goods, gymnasium equipment, sportswear, and even .22 rifles, the story is the same. Shorter hours of labor, with more leisure time, and general realization of the healthful benefits of recreation, have resulted in greatly increased markets for recreational equipment. During 1946 this was reasonable for an appreciable addition to Canada's foreign trade, with chief export markets in the United States, Newfoundland and South Africa.

MOST OF US DON'T KNOW

Hardly anyone—not even the publisher—knows how important a newspaper is to a community.

The smaller the town or village, the more important the newspaper is in its economic life. Its news, editorials and feature stories focus the interest of surrounding territory on the place in which the paper is published.

This force and the force of advertisements by local merchants build an ever-widening trade area. This means more business, more money for schools, homes and churches—a bigger and better town.

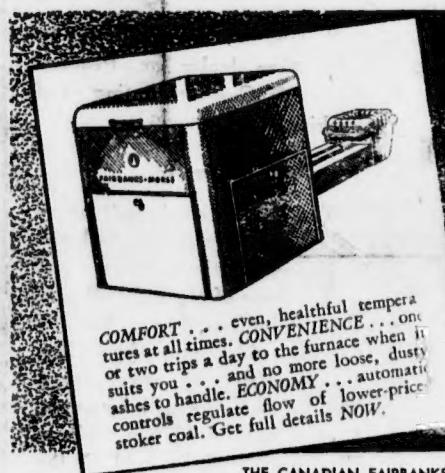

A town with a newspaper is a town with a future. The better the paper, the brighter the future.

It deserves the support of every business man in that town.

We are trying to make this paper worthy of our town. Your help and suggestions are appreciated.

Free Services For Farmers

For the purpose of assisting the farmers of Canada to meet the economic problems with which they are constantly confronted and to carry on the industry of Canadian agriculture to the advantage of the nation as a whole, the Dominion Government has several millions of dollars invested in free services and facilities.

No other industry has at its disposal such a wide and varied range of services and facilities provided by the Government. They include the Dominion-wide system of Experimental Farms and Stations, the divisions of Dairy Research, Botany and Plant Pathology, Chemistry, Entomology and Plant Protection of the Science Service, the divisions of Health of Animals, Plant Production and Livestock with their field services of the Production Service, the Marketing Service, in which is centralized the administration of all grading services of livestock and livestock products, dairy products, poultry, eggs, fruit, vegetables, canned goods, maple products and honey, and the Division of Agricultural Economics, which serves as a fact-finding body concerning production and marketing.

Results of the research work and experiments of all these services of the Dominion Department of Agriculture are made known to farmers and the people of Canada generally through free publications, the press and radio, exhibits and other ways directed by the Publicity and Extension Division.

Those engaged in the industry of Agriculture, whether directly or indirectly, are invited to make full use of the services and facilities as outlined. They are free.

B. OF M. CROP REPORT

Crops, while a week behind
last year, are now making good
progress but continued warm
weather is required to promote
rapid growth. Moisture sup-
plies are ample except in the
Peace River and northern areas
where rains are required to
maintain reserves. Wheat aver-
ages five inches in height.
Those crops damaged by frost
in May have largely recovered.

A big heart enlarges your
home.
